

Jason Mraz - Up

Tom: B

Os acordes devem ser feitos da seguinte forma:

Intro: B Ebm Abm G Gb7

A little like Gene Wilder now coming out of the tower now
 In a glass elevator that could take you all the way to the sky
 Ain't trying to fool you now got nothing to lose no how
 So be in it where you live it can send it to the internet
 Thinking what you're getting is love

All you need is love

Ain't it nice to get out of here?

Already out of the atmosphere

Well if the glass doesn't shatter but it wouldn't really matter

It's the love that is lifting us up

All you need is love

We're going up, up, up flying away
 We're taking the higher route taking the ceiling out
 We're going up; we're flying away
 Never coming down; because we're living it up, living it up!

(B Ebm Abm G Gb7)

What happens when your light goes out?

No one there to give you mouth to mouth

Don't let the breakdown jump on your acclaim that another be a hero now

Cause I know you know because once you know you'll always know

It's your own, your own, your own love that gets you where you want to go

We're going up, up, up flying away

We're taking the higher route taking the ceiling out

We're going up; we're flying away

Never coming down; because we're living it up, we're living it up!

Yeah, we're living it up, living it up

You know that it's good cause only good love when it's really love

You can just love, love, love anything it's your destiny

Yeah Yeah Yeah Yeah Yeah Hey... Paparah

A little like Gene Wilder now coming out of the tower now
 In a glass elevator that could take you all the way to the skyyy

For going up; for flying away

For taking the higher route for taking the ceiling out

We're going up; we're flying away

Never coming down; because we're living it up, living it up!

We're up flying away

We're taking the higher route, taking the ceiling out

We're going up; we're flying away

Never coming down; because we're living it up, living it up

Living it up, living it up

All you need is love

Love is all you need

(B Ebm)
