

## JC Carmo - The Future Of Humanity (Rock Version)

tom: C We are standing at the edge of time Watching for the great unknown Will we find a way to be sublime Or will we fall like stones? We'll take the good and leave the bad And pave a path for all to see A future bright, a future glad Where love and peace will always be The future of humanity Is written in the stars above We'll reach for the sky with all our might And build a world of love We'll harness the power of technology To make a brighter, better place We'll break down the walls of inequality

And show the best the human race

We'll take the good and leave the bad

And pave a path for all to see

A future bright, a future glad

Where love and peace will always be

The future of humanity

Is written in the stars above

And build a world of love

We'll reach for the sky with all our might

We'll take the good and leave the bad And pave a path for all to see

A future bright, a future glad

Where love and peace will always be

The future of humanity

Is written in the stars above

We'll reach for the sky with all our might

And build a world of love
