I don't think it will be errorless.....

When you play this with a slight distortion and no contour it will sound like the sin-e EP. I also think he adjusted the tuning by lowering the low

E to **D**

If you do this these will be the chords...: X30213  
X00210  
060430

That's the part of:"Lying in my bed...etc."

The 060430 chord is played at the end of the verse and from high to low.

I'm pretty sure about these cords, but the folowing chords were a little

bit more difficult to determine, so if you have a better idea,

let me know:

3X3000

000210

That's is the part where he sings : "don't want to weep for you..."

When he reaches the part of the rythems that fall it is:000210  
000430  
000230

Now come's the Black Beauty part. When he sings:"Black Beauty I love you

so" it is 000210, then when he starts to go wild he plays:

X00210, X00430, X00760, X000  
X00210, X00430, X00760,

X0090

X00210, X00430, X00760,

X00770

I'm writing this down without a guitar on my lap, so it could be that some

of the numbers are not exactly right, but you'll get the basic idea..
