

Jeff Satur - Lucid

tom:

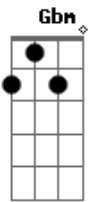

Won't you
Miss the nights we drifted afar
And knew
We would find a place in the stars
For two
Taking you to dance in the sky
The nights
You would be beside me Your lips
To mine Nothing could compare
But every star's light
Waits for you in the dark tonight
I know that nothing ever lasts
Even the good things
If we chase the past, we can only dream
But while it's still lucid, I'll drown in
Before daylight breaks us at the seams
Before the night ends, all just a dream
Before all the memories start to fade
Just think back one last time to the nights like these
Before you're gone and
Before daylight breaks us at the seams
Before the night ends, all just a dream
I just want to hold onto those nights like lucid dreams
Pretending we're still asleep

Before you're gone and wake from me
I fear time will drift you away from here
I'll wait for you in the night as you fade away
Holding every piece till you're gone
I know that nothing ever lasts even the good things
If we chase the past, we can only dream
But while it's still lucid, I'll drown in
Before daylight breaks us at the seams
Before the night ends, all just a dream
Before all the memories start to fade
Just think back one last time to the nights like these
Before you're gone and
Before daylight breaks us at the seams
Before the night ends, all just a dream
I just want to hold onto those nights like lucid dreams
Pretending we're still asleep
Before you're gone and wake from me
(A A Gbm Em)
Recall recall
Before before
Before daylight breaks us at the seams
Before the night ends, all just a dream
I just want to hold onto those nights like lucid dreams
Pretending we're still asleep
Before you're gone and wake from me
