

Jerry Lee Lewis - Earth Up Above

Tom: C

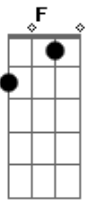

From the Houston Astrodome to the blue skies over Rome
 And in Paris with its towers so tall
 There's a moon up above shared by everyone in love
 Winter springtime in the summer and fall
 And down the road to old Peru down in old Australia too
 Men and women everywhere are fallin' in love

You'll find that everyplace love strikes the human race
 They all share the same ol' moon up above
 We look far ahead with that old moon we hold stead
 And the people livin' there fallin' love
 You'll find that everyplace love strikes the human race
 They all share the same ol' moon up above
 They all share the same ol' moon up above
