[riff 1] :

```

||.      G          Bb  G          |
||
beats  1          2          3          4          |
      G          Bb  G          .||
beats  1          2          3          4
    
```

This strumming (riff 1, guitar 1) goes on in the background pretty much for the whole song (except the Eb D G 'chorus' bit). Over the top of it alternates between guitar 2 playing riff 2 and guitar 3 playing riff 1 over again.

[riff 2] :

```

chords :

Most of the strumming is done on the top four strings only

so for everything except the 'chorus' (Eb D G bit), just move this shape around

E A D G B e  
 x x 5 4 3 3 - G } in riff1  
 x x 8 7 6 6 - Bb }

x x 10 9 8 8 - C }  
 x x 15 14 13 13 - F }

3 5 5 4 x x - G }

/ is slide up  
 \ is slide down  
 h is hammer-on  
 p is pull-off

7pbr7 is fret at 7, pre-bend to 8 then pick and release bend

--/-- is a strum  
 --x--- is strum but mute the strings at the neck

there's still something not quite right with this, any improvements

welcome.....
