

Jon Bon Jovi - Never Say Die

```
You got to look them in the eye
                           tom:
Intro:
                                                             And don't let go
                                                                     Е
As we stood there older than men
                                                                    D
And younger than the boys (that's right)
                                                                         F
We were as still as the wind
That blows on a hot August night
And you were lonesome
As a jukebox
But deadly just the same
I could be as gentle as a newborn
                 D
Then spit into the eye of a hurricane
                                                                      D
                                                             A Bm D 2x
And we knew how to laugh
      D
And we knew how to cry
Yeah, we sure knew how to live
                                                                    D
      D E
But we don't ever
                                                              That died there
Never say die
Never say die
I guess you'd say we had a pact
These words we knew so well (that's right)
Still they remained unspoken
And we'd take them to the fiery
Gates of hell
                                                             Never say die
Once I was afraid of love
                                                             Never say no
But when it's your brother
Those things change
                                                             And don't let go
'Cause love is just another word
For trust
 D
                                                                     D
So hear me when I say
Never say die
                                                                        D
Never say no
                                                             Never say die
Acordes
```

When it's your own blood you'll bleed And your own tears you'll cry When you're brought up to believe That it's the strong who survive Intro: Never say die Solo: igual à base da intro Yeah, and we could run like lightning Through the pouring rain And we'll be standing like a soldier Who comes marching home again They ask what it is that I want written On the gravestone where I'll lie Tell them it's just my bones So save the tears they'll cry My spirit is still riding Somewhere in this night When it's these three words that come to $\ensuremath{\mathsf{me}}$ As I kiss this world goodbye You got to look them in the eye When it's your own blood you'll bleed And your own tears you'll cry When you're brought up to believe That it's the strong who survive Never say die (faz o fade)
