

Josh Tobias - Summer Thing

```
I just want a summer thing
                           tom:
                                                               (A E Dbm B)
                                     Dbm
  Girl I know you're falling
Pretty sure I'm falling too
But my friends keep calling
There's a party on the roof
So let?s dance til morning
Cause it's no more time to lose
                                                               (B A)
There's a man who loves you
But I ain't wearing his shoes
Don't wanna say goodnight girl
But I think it's time you choose
What you want tomorrow
                              Dhm
Might not wait for you
 To be honest
I don't wanna love you
                                                              Dbm E
                                                              0000000000h
I just wanna make mistakes
                                                              0oooooh
To be honest
                                                              Dbm
                                                              0000000
I don't wanna slow dance
                                                              Just a summer thing
I just wanna feel the rain
                                                              Just a summer thing
To be honest
                                                              B A
To be honest
I just wanna summer
I just wanna summer thing
I just want a summer
I just wanna summer thing
                                                              To be honest
I just want a summer
I just want a summer thing
```

To be honest

I just wanna summer thing

Dbm
I just wanna summer

B A E
I just wanna summer thing

B A I just wanna summer thing

Dbm
I just wanna summer thing
