

Kayden - I Found You

tom:
 Capotraste na 1ª casa

We grew up in a city that can't see
 A point in ever tryna grow up
 So naturally I found what made my heart beat
 Took it to the room and that was all
 Cause we were so young we had no clue
 Where we would be in life but we know tonight
 Everything that we worried about
 Though it would be alright
 No car no job no worries
 Just me and a heart that never
 Knew what it wanted

Cause being 17 was enough
 We write down everything
 That we thought that we loved
 And we drive down to San Francisco for fun
 We walked down every street until
 We found what we loved
 And I found you

They say I gave up but I just take it day by day
 And they say follow your heart cause it never leads you astray
 And I can live with fear but one thing I cannot accept
 Is to look back on my life and know I gave up on myself
 And my only regret is telling you I'm afraid
 Cause in 20 years from now it wont matter anyway
 All the money in the world, no it will never be enough
 When I look back on my life
 I wanna say that I gave more than my
 Clothes, my cars, my house, my money
 I would trade it all for one more minute

Cause we were so young we had no clue
 Where we would be in life but we know tonight
 Everything that we worried about
 Though it would be alright
 Cause being 17 was enough
 We write down everything that we thought that we loved
 And we drive down to San Francisco for fun
 We walked down every street until
 We found what we loved
 And I found you
