

# Keane - Neon River

Tom: E  
Intro:

Well, you were happy where you were  
But that girl she wheeled you in  
This time was never good enough  
'Cause she was gone and seen everything  
And if you ever spoke of love  
She just smiled and put you down  
'Cause she was making all the plans  
She had a vision of light and sound  
She said the neon on the river will light my way  
And everything that we've been dreaming of making real one day  
So save your money pack your bags  
We better run before we disappear  
She took the train into the city but you're still here  
You hear a song that takes you back  
The song long for God tonight  
And friends who said they hang your back  
But they just turned them round and let you fight  
And in the bowling alley wall  
You used all your smartest minds

But they'll be painted over now  
Looks like here gonna get left behind  
She said the neon on the river will light my way  
And all the things that we've been dreaming of making real one day  
So save your money, pack your bags  
I wanna run with you on Stamford hill  
She took the train into the city but you stood still  
You stood still about the train  
You knew as you watched her go  
That she wan never coming back  
And start to places that you know  
You said you're scared if I  
Ad I didn't want to go  
Where everyone else goes  
She said the neon on the river will light my way  
And everything that we've been dreaming of making real one day  
So save your money pack your bags  
We better run before we disappear  
She took the train into the city but you're still here  
She took the train into the city but you're still here

## Acordes
