Guitar 1: CAP0 ON 3rd FRET (or 1st FRET as played on album)
 Intro: (Play this twice)

Verse 1

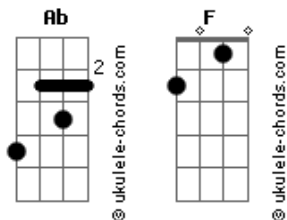

Through the alleyways to cool off in the shadows
 Then into the street following the water
 There's a bearded man paddling in his canoe
 Looks as if he has come the way from the Cayman
 Islands

Verse 2

These canals, it seems, they all go in circles
 Places look the same, and we're the only difference
 The wind is in your hair, it's covering my view
 I'm holding on to you, on a bike we've hired until tomorrow

Bridge

Acordes

Verse 3

If only they could see, if only they had been here
 They would understand, how someone could have chosen
 To go the length I've gone, to spend just one day riding
 Holding on to you, I never thought it would be this clear

(Play intro three times to finish)

Cayman Islands
 Kings of Convenience
 Tabbed by Basso De Felice

This is the tab of the main picking of the song (I think of the nylon stringed guitar) and it is the same for the entire sung part. It might be played with capo at first fret. The tab is not completely exact (I think that the chords are right but the position could be different) but is easy to play and it sounds good.
