

# Led Zeppelin - In My Time Of Dying

Tom: C

A few things to note: This song is played with a slide in standard tuning (as far as I can tell). I may have some of the nuances a little off (like where to begin a particular slide etc.), but hopefully this will give you an idea of how to play it.

Opening riff: (set tone to "crunchy" :-))

wait                      slow slide

Another part:

Repeat that once.

Yet another part: (a little faster than previous progressions)

repeat

repeat

Now, right after that last 5-5 power chord, there's a little piece that I can't figure out. It leads to this fast part, tight with the drums:

Repeat several times.

I'm not sure what the standard nomenclature is, but here is what I meant:

- (X)/Y : Start slide at X fret, slide up to Y fret.
- X Y : Pull slide off strings.
- X~ : Hold and "wiggle" slide for a tremolo effect.

## Acordes
