

# Lina Morgana - My Angel

tom:

C

My angel You're always near

My angel You're all I fear

The silent clouds tell me that something's wrong

They're moving towards me and it won't be long

I try to run but my body's frozen over

But I won't be afraid

No I won't be afraid

And I don't believe when you said you even loved me

But I won't be afraid

No I won't be afraid

And I don't believe when you said you even loved me

Been wearing the mask to hide what's true

Under shades of glass there's black and blue

The time has come to dig the grave

To bury your heart that just can't be saved

The silent clouds tell me that something's wrong

They're moving towards me and it won't be long

I try to run but my body's frozen over

But I won't be afraid

No I won't be afraid

And I don't believe when you said you even loved me

You don't know how scared I am to have to see you again

You don't know how lost I am, I don't think you understand

But I think it's time I really should leave

I'll take a piece of you with me, so please don't reach out to me

The spell is broken... now I'm free

The silent clouds tell me that something's wrong

They're moving towards me and it won't be long

I try to run but my body's frozen over

But I won't be afraid

No I won't be afraid

And I don't believe when you said you even loved me

My angel You're always near

My angel You're all I fear
