Lost And Found - Day After Day

Tom: C

```
   C            F
I remember you today
G
Way back when we used to say
C         F                G
"Let's go make believe deep in the field"
C               F
Cattle grass and horses' hay
G
Blowin' in the wind all day
C           F           G
Growin' up just seemed so far away

Am                      F
But in my heart there is my home
              C
Day after day
     G        Am      F              C
So young, headstrong, daylight would last so long
        G          Am       F
Did you see what I believed back then
              C
Day after day
              G      Am      F            C
Small homes, tall trees, cold creek against our feet
       G              Am           F
And I see how much you've grown since then

              C
Day after day
     F          G
We'll always be
              C       F       G
One in the same, just you and me
              C
```

```
Day after day

C               F
What we had will always be
G
Deep inside of you and me
C          F                  G
We can be the roots that hold the tree
C               F
Dreaming between now and then
G
Yesterday was all pretend
C           F            G
Wonder if the future holds the key

Am                      F
But in my heart there is my home
              C
Day after day
     G        Am      F              C
So young, headstrong, daylight would last so long
        G          Am       F
Did you see what I believed back then
              C
Day after day
              G      Am      F            C
Small homes, tall trees, cold creek against our feet
       G              Am           F
And I see how much you've grown since then

              C
Day after day
     F          G
We'll always be
              C       F       G
One in the same just you and me
              C
Day after day
```
