

## **Lynyrd Skynyrd - Tomorrows Goodbye**

Tom: C I'm just a city boy But there's a small town side to me And I feel it closing in Are we blind to see That she's dying more each day And she's crying out to you and me Chances come and when they're gone They curse the fools who wait to long So let's take care of what we have Before the good we know goes bad And the beauty fades and just slips away D G The dirty air, the dying seas Will this be the wold we leave To the wild and young I say, just look at what we've done  ${\color{red} G}$ And right before your eyes Today's yesterday D G D Am C D Will be tomorrows goodbye D Here comes the rain D And it might wash her tears away D But it doesn't change a thing D Like my brother before me C All I can do is write this song D Am C D G And for her I sing Chances come and when they're gone Am G C

The carve in stone what we've done wrong So let's take care of what we have Before the good we know goes bad And the beauty fades and just slips away The dirty air, the dying seas Will this be the wold we leave To the wild and young I say, just look at what we've done C And right before your eyes Will be tomorrows goodbye (F G) Do you ever think about G The future or the past Do you ever wonder How long this world will last (GDAmCD) (2x)So let's take care of what we have Before the good we know goes bad And the beauty fades and just slips away The dirty air, the dying seas Will this be the wold we leave To the wild and young

I say, just look at what we've done G C D

And right before your eyes

Will be tomorrows goodbye

D

( G D Am C D G )
