

Marden - "Dreaming Us"

tom:

G

[Primeira Parte]

In a dream that kept repeating
 I saw your face, your smile, a love meeting
 Never met before, yet I know
 In another encounter, we invented us somehow

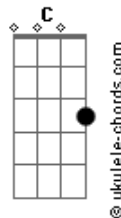

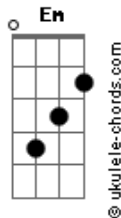

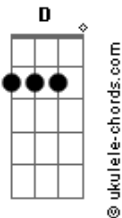

[Refrão]

Love invented, awake and dreaming
 Our souls touched in this seeming
 Our gazes locked in sync
 As if we loved in another link

[Segunda Parte]

In a past life, who were we?
 The answer found when you looked at me
 Destiny brought us together
 In dreams, we lived, now it's real, forever
