Marden - "Dreaming Us"

```
                            tom:
                  G
```

[Primeira Parte]

```
        G              D
In a dream that kept repeating
     Em         C         G
I saw your face, your smile, a love meeting
         G            D
Never met before, yet I know
        Em          C              G
In another encounter, we invented us somehow
```
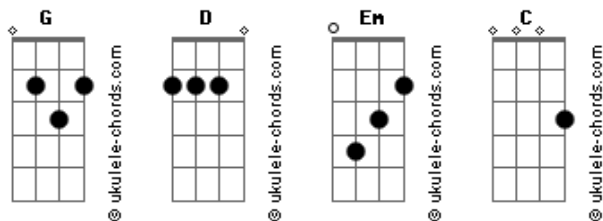

[Refrão]

```
        G           Em
Love invented, awake and dreaming
      C             G
Our souls touched in this seeming
      G           Em
Our gazes locked in sync
      C             D
As if we loved in another link
```

[Segunda Parte]

```
        G                D
In a past life, who were we?
      Em          C          G
The answer found when you looked at me
         G            D
Destiny brought us together
      Em          C              G
In dreams, we lived, now it's real, forever
```

[Refrão]

```
        G           Em
Love invented, awake and dreaming
      C             G
Our souls touched in this seeming
      G           Em
Our gazes locked in sync
      C             D
As if we loved in another link
```

```
( G   D   Em   C   G )
( G   D   Em   C   D )
```

[Refrão]

```
        G           Em
Love invented, awake and dreaming
      C             G
Our souls touched in this seeming
      G           Em
Our gazes locked in sync
      C             D
As if we loved in another link
```

[Final]

```
        G           Em
Love invented, awake and dreaming
      C             G
Our souls touched in this seeming
      G           Em
Our gazes locked in sync
      C             G
As if we loved in another link
```
