

Marden - Masks

tom:

[Intro] Em C G D

[Primeira Parte]

Em C G D
 We're good because there are consequences, they say
 Em C G D
 But if we remove the chains, who will we truly be?
 Em C G D
 It's like taking off a mask, revealing what lies beneath
 Em C G D
 The shadows we hide, the side we always keep
 Em C G D
 Behind the good deeds, the carefully chosen words
 Em C G D
 There's a truer self that many of us conceal
 Em C G D
 When there's no more punishment, when there's no more fear
 Em C G D
 We'll be able to face who we are, without any veil

[Refrão]

G D Em C
 Masks fall off, revealing the true face
 G D Em C
 When there are no consequences, the hidden is revealed
 G D Em C
 We're all actors on a stage, playing roles
 G D Em C
 But when the curtains close, we show who we truly are

[Segunda Parte]

Em C G D
 Many live their lives without truly knowing themselves
 Em C G D
 Trapped in their own illusions, in their own act
 Em C G D
 But when the world crumbles, when everything falls apart
 Em C G D

That's when we see the truth, without masks, without disguise

Em C G D
 Consequences shape us, teach us what is right
 Em C G D
 But when they disappear, what stops us from going wrong?
 Em C G D
 That's when we must look within, to find the light
 Em C G D
 And accept that we're human, with virtues and also the cross

[Refrão]

G D Em C
 Masks fall off, revealing the true face
 G D Em C
 When there are no consequences, the hidden is revealed
 G D Em C
 We're all actors on a stage, playing roles
 G D Em C
 But when the curtains close, we show who we truly are

[Ponte]

Am C G D
 So don't be afraid to be who you are
 Am C G D
 Even if it means stripping away the faith
 Am C G D
 Because only when we're honest, can we grow
 Am C G D
 And find the peace we seek to know

[Refrão]

G D Em C
 Masks fall off, revealing the true face
 G D Em C
 When there are no consequences, the hidden is revealed
 G D Em C
 We're all actors on a stage, playing roles
 G D Em C
 But when the curtains close, we show who we truly are
