

# Marilyn Manson - The speed of pain

Tom: G  
Intro: Em Em (4x)

They slits our throats  
Like we were flowers  
And our milk has been  
Devoured

When you want it  
It goes away too fast  
When you hate it  
It always seems to last  
But just remember

When you think you're free  
The crack inside your fucking heart is me

I... wanna out... race the speed of pain... for  
another... day

I... wanna out... race the speed of pain... for  
another... day  
I wish I could sleep

But I can't lay on my back  
Because there's a knife  
For everyday that I've know you

When you want it  
It goes away too fast  
When you hate it  
It always seems to last  
But just remember  
When you think you're free  
The crack inside your fucking heart is me

I... I wanna out race the speed of pain... for  
another... day

I... I wanna out race the speed of pain... for  
another... day

Lie to me, cry to me, give to me I would  
Lie with me, die with me, give to me I would  
Keep all your secrets wrapped in dead hair... for always  
Keep all your secrets wrapped in dead hair... for always  
Lie to me, cry to me, give to me I would  
Lie with me, die with me, give to me I would  
I hope at least we die holding hands... for always  
I hope at least we die holding hands... for always  
I hope at least we die holding hands... for always

## Acordes
