I lost my head out in the cold

We end up where we were before, right there at the scene

G D
Like an open door to an empty room
Bm
It's still a part of me needing part of you
G D
In another life we could work it out

But we never speak, so it's hard to
C D
Do we really want to live this way?
C D
Cause all I really want is you to stay
C D
Maybe it's easier, comatose

All temptations we created
