

Mina Okabe - Every Second

tom:
[primeira parte]
Every second, every day
I spend hoping we never change, love when you
Never wait or hesitate
To tell me what is on your mind, really do
Enjoy your company, i think you would agree
Just where you'd rather be is right here with me
Make my day in every way
Know i'll be okay when you are around

[pré-refrão]
I just want to stop
Worrying 'bout what could come
[refrão]
I really like it here in your arms
Thinking this is where i belong
I had no doubt in my mind we would make it far
Now i fear a change, want time to stop
[segunda parte]
Waiting for an argument
Inevitable but don't know how bad
The smallest things will get to you
Hoping we won't be a thing of the past
But where we are today is where i want to stay
Leave worries far away when you're here with me
I should just enjoy this time
In case we end up leaving all this behind

[pré-refrão]
I really like it here in your arms
Thinking this is where i belong
I had no doubt in my mind we would make it far
Now i fear a change, want time to stop
[final]
(yeah, i'm always with you)
I wanna remember this moment in time
(though i'm always with you)
I wanna remember if we leave this behind
(yeah, i'm always with you)
I wanna remember this moment in time
(though i'm always with you)
I wanna remember if we leave this behind
