

Nano - Hysteria

tom:

Intro: Ab Bb Cm Gm Eb

All of these cuts and bruises that will fade away
 I act as if they've made me that much wiser
 Another night sink into my lonely bed
 To shut out every sound as I scream inside my head
 And like a turning wheel the time keeps moving on
 The pain from yesterday is now just so long gone
 And as I fall into another aching sleep
 The crying voice I keep on hearing echoes deep

It's every shameful fall, every mistake that I've made
 These are the scars that have brought me where I am today
 Another false conception that I fed myself to escape reality
 The only lie I see is now inside of my head
 The only truth slips through my fingertips in the end
 Let me keep on dreaming as I watch the days just pass me on by
 I turn another page of my biography
 And all the mysteries begin to fall in place
 I wonder why I wasted so much precious time

I'd never find my life inside this cluttered room
 I'm letting go today
 They try to measure the depths of all the scars that we have
 And try to prove to us that life could be so much more
 But if you'd only stop and take a look around
 You'd know we're all the same
 And as I keep repeating all the days in my head
 It's like endless movie that has no happy end
 But the scene goes on without an answer and I will cry
 (Ab Bb Cm Bb)
 It's every shameful fall, every mistake that I've made
 These are the scars that have brought me where I am today
 Another false conception that I fed myself to escape reality
 The only lie I see is now inside of my head
 The only truth slips through my fingertips in the end
 Let me keep on dreaming as I watch the days just pass me on by
 Pass me on by
