

# Ne-Yo - Back To What You Know

Tom: C

(intro) Em Am

(Em Am )  
 I don't know where to begin  
 Fighting a war I can't win fighting a memory  
 Something that used to be (Mmm)  
 No matter how hard I fight  
 All of my strength and might  
 Keeps on defeating me it just keeps on defeating me.

(Em Am )  
 So what I'm trying to say I know what's happening  
 Your body is here with me  
 But your heart and your mind is still with him.

(Em Am )  
 Go back to what you know  
 Go back to where you know where your heart is  
 Girl just be honest this is impossible  
 This is impossible we'll never work cause you don't  
 want it

Girl you belong with him so just go back to what you  
 know

Go back to what you know because this is impossible.

(Em Am )  
 Telling me things that you two did when he was with  
 you  
 How he was oh so sweet the way that he used to treat  
 you

Instead you just can't keep him outta your mind.  
 Why can't you just tell me that I'm not who you want  
 to be

Baby you don't want me no no no.

(Em Am )

So what I'm trying to say I know what's happening  
 Your body is here with me

But your heart and your mind is still with him.

Go back to what you know

Go back to where you know where your heart is

Girl just be honest this is impossible

This is impossible we'll never work cause you don't  
 want it

Girl you belong with him so just go back to what you  
 know

Go back to what you know because this is impossible.

(Em Am )

And if that was really what you want

I will not stand in your way you want to be free

I will let you be

I rather you have me than miserable with me

Back to what you know

Back to what you know

Said back to what you know.

(Em Am )

Go back to what you know

Go back to where you know where your heart is

Girl just be honest this is impossible

This is impossible we'll never work cause you don't  
 want

Girl you belong to him so just go back to what you  
 know

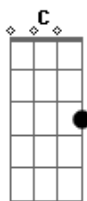

Go back to what you know because this is impossible.

So there ain't no need to make those lies

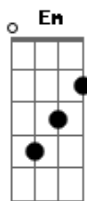

You're stuck in the past

Pedal to the gas and drive away
