G  
Just hang your head in shame  
Am  
We're dancin' into the void again  
Lets just draw a picture  
G

Of this world we all live in  
D  
There's nothing that you can't erase  
Or even pencil in  
Am  
No self respecting alien  
Would give a second glance  
Let's face it, it's a hopeless task  
G  
We haven't got a chance  
D  
So how we gonna market  
This old bubble we call ours  
Am  
When it's battered, bruised  
Exhausted  
And counting down the hours  
C  
We could take it off the market  
G  
And do some D.I.Y  
D  
But how do you a loin forest  
Or mend holes in the sky  
C  
Our drains just ain't big enough  
To take El Nino  
Am  
So unless we build a million arks  
G  
We'll have nowhere to go  
We'll be floatin' on a pond  
That'll stretch from there to here  
D  
And as long as we keep playing God  
C  
We'll have nothing left to lose my friend  
But everything to fear  
( D Am G )  
( D Am G )  
( D C )  
Am  
When we're standing there  
G  
For the curtain's fall  
D  
And the final dance  
Am  
Is to the void evermore  
And you find your star  
G  
A million years away  
D  
Just remember this  
C  
We could have saved it all  
( Am )
