                                                                 Wish as I might
                                                                 Grant me this one small wish
Verso 1: G G2 G G2
I've had a fire burnin'
Since the holidays began
                                                                 On Christmas night
I hear it's cold out where you're livin'
But any colder than I've been?
                                                                 'Cuz I don't need candy
                                                                        D
I've been an animal since you left me
                                                                 Or the toys from my youth
I need you wrapped under my tree
                                                                      Em
My Christmas cheer is here and ready
                                                                 I just want you oh darlin'
But where are you to set it free
                                                                 I just want you

Outside the snow is falling, and I'm singing

'Cuz I don't need candy
