

Nickelback - Song On Fire

```
I could set this song on fire, send it up in smoke
Intro: Gbm A Bm D
                                                               I could throw it in the river and watch it sink in slowly
The first words that come out
                                                               Tie the pages to a plane and send it to the moon
And I can see this song will be about you
                                                               Play it for the world, but it won't mean much
I can't believe that I can breathe without you
                                                               Unless I sing this song to you
But all I need to do is carry on
The next line I write down
                                                                I could set this song on fire
And there's a tear that falls between the pages
                                                                Sing this song to you
I know that pain's supposed to heal in stages
                                                                I could set this song on fire
But it depends which one I'm standing on
                                                                Light this old guitar on fire, I'd still hear the notes
I write lines down, then rip them up
                                                               Drown the melody in water, I'd still hear it's ghost
Describing love can't be this tough
                                                                Sing it with somebody else, but we'd be out of tune
                                                                Play it for the world, but it won't mean much
I could set this song on fire, send it up in smoke
I could throw it in the river and watch it sink in slowly
                                                                I could set this song on fire, send it up in smoke
                                                                I could throw it in the river and watch it sink in slowly
Tie the pages to a plane and send it to the moon
Play it for the world, but it won't mean much
                                                               Tie the pages to a plane and send it to the moon
Unless I sing this song to you
                                                                Play it for the world, but it won't mean much
(Gbm A Bm D)
                                                               Unless I sing this song to you
    Gbm
I'm dying to show you
                                                                I could set this song on fire
This could end happily ever after
                                                               Unless I sing this song to you \\
There doesn't ever have to be disaster
                                                               I could set this, I could set this
And all you have to do is sing along
                                                                I want to sing this song to you
                                                               I could set this song on fire
I write lines down, then rip them up
                                                                Sing this song to you
Impossible describing love
                                                               I could set this, I could set this
