Ok so, I like metal and rock and everything but this song is classic and on the whole, and vocally this song is amazing. Anybody who likes music should like this song.

For the whole thing is you have multi-effects just play around with delays and phasers stuff, a little bit of pitch shifting. Any way you play it it'll sound cool. Comment/Rate whatever if you want. Have fun.

Piano arranged for guitar

Next, just fool around with bends, hammer-ons, pull offs on the 7 and 9
