Let me warn you, this **TAB** is not quite as complete as I try to get my NIN tabs, but it contains all the guitar and main synth parts of the song that I could hear in the wall of noise:)
Tune your bottom string down to **D** (it's not really necessary, you can just play the **D** power chord straight, but the extra bottom string sounds more full, the bass must be tuned down though)
E-mail me with questions/comments/requests...
