**Acordes** 

We met in a place I used to go
Now I just walk by it for show
Can?t bear to go in without you, you know
Wish I could
Wish I could

But Annie is standing in the door With a look on her face I can?t just ignore She tells me that her heart is sore And pulls me in She pulls me in

She says "Love in the time of war is not fair? "He was my man but they didn?t care? "Sent him far away from here? "No goodbye? "No goodbye?

I don?t tell her that I once loved you too Or about all the things we used to do I kiss her hair and think of you Walking down
The road you found

We met in a place I used to go
Now I only walk by it for show
Can?t bear to go in without you, you know
Wish I could
Wish I could
Wish I could
Wish I could
