

Oliver Tree - Sick of U (feat. BoyWithUke)

tom:

Am

Things are better off this way
 Wish you never ever knew my name
 Wish I never said hi 'cause you got really cute eyes
 I don't wanna cut ties just to kiss your face
 So things are better this way
 Get out of my brain, I'm out of my lane
 I'm not playing this game
 I know I'll be fine, I can tell you tell lies
 And I hope you don't mind that I turn away

[Refrão]

'Cause you'll just do it again
 And you'll fuck all my friends, and you'll just fuck with my head
 And I'm so done with the mess you left embedded in lead
 I want you out of my life, I'm sick of all of your lies
 I'm sick of all the little things you used to do with my mind
 'Cause you'll just do it again
 You just love to pretend to be innocent
 Fuck you, I think you're insignificant
 Don't you look at my eyes, go and say your goodbyes
 You fucked up bad, and now you're wasting my time

[Segunda Parte]

You treated me wrong, I'm so glad you're gone
 Why can't I move on?
 You fill me with hate, you made my heart break
 Still, I can't escape
 I tried and I tried, but I'm left dead inside
 And you're killing me slowly without even knowing
 Well, love is a cost, and both of us lost
 It went on way too long
 Like it never would end 'til the day that we're dead
 And both of us are gone
 I tried and I tried, we both have lost our minds

I felt so sick to my stomach, but I know that you love it
 [Refrão]

'Cause you'll just do it again
 And you'll fuck all my friends, and you'll just fuck with my head
 And I'm so done with the mess you left embedded in lead
 I want you out of my life, I'm sick of all of your lies
 I'm sick of all the little things you used to do with my mind
 'Cause you'll just do it again
 You just love to pretend to be innocent
 Fuck you, I think you're insignificant
 Don't you look at my eyes, go and say your goodbyes
 You fucked up bad, and now you're wasting my time

[Terceira Parte]

You made my heart break and my stomach ache
 And in my mouth you left a terrible taste
 Why do I love you still?
 I got physically ill from every shitty thing you made me feel
 (Ahem) Yuh, and it's so cold, but what do I know?
 I got somebody in my psyche hittin' high notes
 I got nobody on my side, I'm a psycho
 Might go at night, I'm a boy with a knife, woah
 Thank God every night for my nice home
 Even if I wish I'd die, I'm alright bro
 Thoughts stay inside my mind with a light code
 Life goes on and on

[Refrão]

'Cause you'll just do it again
 And you'll fuck all my friends, and you'll just fuck with my head
 And I'm so done with the mess you left embedded in lead
 I want you out of my life, I'm sick of all of your lies
 I'm sick of all the little things you used to do with my mind
 'Cause you'll just do it again
 You just love to pretend to be innocent
 Fuck you, I think you're insignificant
 Don't you look at my eyes, go and say your goodbyes
 You fucked up bad, and now you're wasting my time
