

# Ozzy Osbourne - Get's Me Through

Tom: C  
Intro: transcribed for guitar:

Distortion (I tap here, some people pick the note)

[Main Riff]  
I've seen many people striking the fifth fret of the E string and hammering on seven...however, if you think its easier you can hammer on the A and D string, as shown in paranthesis. Also when playing this there are parts where you have to stop the strings from ringing, under which I'll put a star, you should be able to figure it out tho.

In the belowriff u have to bend the E string(fretted 2) to G, so its about a quarter bend.

[Verse]  
This isn't actually palm muted, as I said before, its played open but with the volume turned down..however..I still palm mute it live because u don't really have time to toy with the volume.

[Interlude]  
Vibrato all these chords, just shake your hand a bit, I know he vibratos.

Solo:  
Use a wah all the way open(pressed forward)  
Also, in the beginning of the solo many tabs have had it played on the G string..in the video and in concert(my friend saw them, so I'm going by his word here) Zaak in fact plays it on the B

There are some sfx in the sliding sounds

(Do some sliding on the G and D string here)  
\\(heel back on the wah for this)
