

Phantom Planet - Something Is Wrong

Tom: G

By InfamousMars Standard Tuning Intro:

Verse

Burn me down if that's how everything's gonna

start. With a flame from the heat

of the look on your face. On a day

like today could of made out every raindrop fallin' down

Acordes

on your hair.

Now I fear that I may taste

these tears rolling down my face, and realize

something is wrong with the light

of the sun, and the color of the sky; with you

and everyone.
