

# Phillip Phillips - Get Up Get Down

Tom: C

Get up, get down, get a little bit closer to the scene  
 Find out what's there, something new to conceive  
 Get up, get down, get a little bit closer to me  
 Find out what's there what you can be

Yesterday was our time to turn back again  
 And instead we went through the fire to get lost in sin  
 Burn, baby, burn let me cool you down again  
 Turn, baby, turn to see where it all begins  
 'Cause it's alright, it's out there

Go and get lost, girl  
 It's alright, I'm out there  
 N.C.  
 Let me take control

Get up, get down, get a little bit closer to the scene  
 Find out what's there, something new to conceive  
 Get up, get down, get a little bit closer to me  
 Find out what's there what you can be  
 Walk it off but keep it on let it take control of  
 Every cell inside your body, each and every bone  
 Burn, baby, burn -- let's cool it down again  
 Turn, baby, turn to see where it all begins

Yeah it's alright, it's out there  
 Go and get lost, girl  
 It's alright, I'm out there  
 N.C.

Let me take control

Get up, get down, get a little bit closer to the scene  
 Find out what's there, something new to conceive  
 Get up, get down, get a little bit closer to me  
 Find out what's there what you can be  
 Na na na na na no  
 Na na na na na no  
 Na na na na na no  
 Get up, get down, just a little bit  
 Get up, get down, just a little bit  
 Get up, get down, let's get lost in this merry-go-round and round

Na na na na na no  
 Na na na na na no  
 Na na na na na no  
 Get up, get down, just a little bit  
 Get up, get down, just a little bit  
 Get up, get down, find out what's there, find out, baby, it's you and me

Get up, get down, move a little bit closer to the scene  
 Find out what's there, something new to conceive  
 Get up, get down, get a little bit closer to me, girl  
 Find out what's there what you can be

Get up, get down, move a little bit closer to the scene  
 Find out what's there, something new to conceive  
 Get up, get down, get a little bit closer to me, girl  
 Find out what's there what you can be
