(solo)

(final) Shine With me - 3x

why dont you come with me
And take a trip to the other side
Where you, you and I we can sing, we can fly.
We can dance as the stars go by
And if the heavens should open up
With a vision inside Jah love
The earth and the moon and the sun will align
With the voice from the sky above
One love

So come on and shine with me
Like the beautiful star you are
So come on and shine with me
Shine with me

Flow through the sky
And look through my eyes
Then you will see what happens
Nowhere to hide, but deep down inside
In life you must take your chances
And come with me and you will see

Come with me
And you will see
It's One Love

So come on and shine with me
Like the beautiful star you are
Leave it behind with me
Cause forever is not that far
Come on and shine with me
Like the beautiful star you are

Shine On! Shine On! Shine On! - One Love!

So come on and shine with me
Like the beautiful star you are
And Leave it behind with me
Cause forever is not that far
So come on and shine with me
Like the beautiful star you are
And leave it behind with me
And shine with me
And shine with me!
And shine with me!
