The song is basically very simple !! It isn't really
too much fun to play as there isn't much action going on, but
here goes...

After much e-mailing around the world I've finally
settled on the guitar over the verses. It's used with a harmonizer.

Play the natural harmonics at the 5th fret at shown
over the lyric "this time the bullet cold rocked ya"
The last time hold the harmonics and lower the pitch
using the tremelo arm.

verse:

this time the bullet cold rocked ya
(Nazi salute..) and a swastika
nothing proper about your propaganda
fools follow fools (rules ?) when the set

commands ya

you said it was blue
but your blood runs red
thats how you got a bullet blasted through

your head

blasted through your head, blasted through

your head

take a shot at the living dead

Guitar stops - some weird tones (noises) produced
using the pickup selector switch and one note over
the vocals.

Acordes

we stood and watched as the Feds cold
centralized so serene on the screen had us mesmerized
cellular phone sell me the death tone
realise (something..) turn you to stone before you

I'm doing this from memory now -
and I really can't remember the next vocals

...
...
...
and muthafuckers lost their minds..

just victims of the in-house drive by

they say jump you say how high

repeat

Then comes a short lead break:

not sure about the last 2 notes above
Just victims etc

I haven't got a clue about the next verse, but anyway,
now for the killer main riff

That's it !!
Buy a harmonizer and ENJOY !!!
