

## Ray Stevens - Help Me Make It Through The Night

```
Tom: D
                                                                Help me make it through the night
  [Intro] C7
                                                                I don't know what's right or wrong
Take the ribbon from your hair
                                                                I don't try to understand
Shake it loose and let fall
                                                                Let that devil take tomorrow
Layin soft against your skin
                                                                'Cause tonight I need a friend
Like the shadows on the wall
                                                                Yesterday is dead and gone
Hold it, hold it, I say hold it, son! That ain't movin' me!
Let's put a little fire in it!
                                                                And tomorrow's out of sight
"Three gunshots"
                                                                And it's sad to be alone
( F C7 )
                                                                Help me make it through the night
                                                                Yes it's sad to be alone
Take the ribbon from your hair
                                                                "Gunshot", "thud"
Shake it lose and let it fall
                                                                "Shift back to jazzy waltz"
Lyin' soft against your skin
Like the shadows on the wall
                                                                Help me make it through the night
                                                                "Drinking sounds", "belch", "whistle"
Come and lay here by my side
                                                                - Hold it!
'Til the early mornin' light
                                                                - Ohhh! Ohhh!
All I'm takin' is your time
                                                                "Gunshot", "breaking glass", "thud"
                                                                Well now I say, I say that's more like it!
```
