NOTES:  
I believe this tab to be accurate, although a few notes might be wrong (especially in the ending). If you find a more correct solution, then mail me. Also, I haven't written the timing in this tab, so play along with the CD to get the rythm.

TECHNICAL INFORMATION:  
I think Dave Navarro uses a clean guitar sound with no distortion and a delay effect added. You can hear the delay effect very clearly on the guitar fill and the bridge. Near the ending he uses some sort of a waah-waah effect.
