A E  
Where have you been

All this time I stayed here?  
Could kiss your lips for the rest of my life  
Could love you girl for the rest of my life

You are my sunshine  
You are my moonlight  
Do, do, do, do

When I'm with you  
The world seems to be cool  
Could stay with you 'til the end of the world  
Could stay with you without saying a word

You are my sunshine  
You are my moonlight  
You are my sunshine  
You are my moonlight
