

## **Robbie Williams - King Of Bloke And Bird**

```
Tom: G
                                                                                 They built museums
                                                                                 I dont visit them
   Riff 1
                                                                                 I've made enough trouble of \ensuremath{\mathsf{my}} own
Riff 1:
           .... Speak so loud
                                                                       Into the night
           I cant hear what you say
           Except for the occassional word
                                                                       Searching hard
           So fates a sentimental side
                                                                       Look for the light
           It bothers me
           No longer king of bloke and bird
                                                                       Of love
All of my life
                                                                                   D
                                                                       Summon me now
Searching hard
                                                                                   Am
                                                                       Summon my life away
Down in the wilds
                                                                                  D
                                                                       Summon me onto another day
    Em
Of love
                                                                                      D
                                                                       Summon the evening winter waves of falling down again
            D
                                                                                                        Am
Summon me now
                                                                       I sing from the chaos in my heart
            \mathsf{Am}
                                                                       My heart
Summon my life away
                                                                                  Then comes the evening
That makes life worth living
Shoving the shoes out in the light
           D
Summon me onto another day
riff 1: A hand through the clouds
                                                                                  She walks in
          Keeps knocking me down
                                                                                  I can hear her
         It's no less than I deserve
```

## **Acordes**
