Samuel Allen - Snowglobe

```
                              tom:
                  E
Intro: Dbm  E

E                    Abm
 You live in a snowglobe
                             Dbm
And everything you know is turning

Upside down
Gbm7  B
Upside down

E                            Abm
 You're the beauty in the chaos
                          Dbm
They will never break us down
      Gbm  B
Break us down

              Dbm        E
So baby come away with me
                               B    Gbm
There's a world that you've never seen
                        Dbm   E    B
From the city to the evergreens
                           Dbm    E
You've gotta leave your world behind
                              B      Gbm7
But don't worry cause I'll give you mine
                         Dbm
You're living in the lies
         E              B
Let them die let them go
        A
But you won't

E                    Abm
 You live in a snowglobe

It's all you've ever known and you're
Dbm
Scared to leave
Gbm  B
Scared to leave

E                            Abm
 And I'm running out of patience

Cause I'm running after you and
      Dbm
You're standing still
Gbm   B
Standing still

              Dbm       E
So baby come away with me
                              B  Gbm
There's a world that you've never seen
                                   Dbm    E    B
From the city to the evergreens
                                   Dbm      E
You gotta leave your world behind
                                      B        Gbm
But don't worry cause I'll give you mine
                                   Dbm
You're living in the lies
                E           B
Let them die let them go
                A
But you won't

( Dbm  Ab  A  B )

Dbm              Ab
 Years down the road
                        A
In your little snowglobe
                           B
You'll hear me talk to you
                        (B  Cm )
But through your radio
Dbm             Ab
 And maybe someday
                              A
You'll see the lies on the page
                              B
You'll see the truth in my face
                            Gbm
You'll see the tears I've saved
                           Ab  Dbm
You'll hear the words I say

Dbm                        E
 So baby come away with me
                               B    Gbm
There's a world that you've never seen
                        Dbm   E
From the city to the evergreens
B
Yeah, Oh

Dbm                        E
 So baby come away with me
                               B    Gbm
There's a world that you've never seen
                        Dbm   E    B
From the city to the evergreens
                           Dbm      E
You gotta leave your world behind
                              B        Gbm
But don't worry cause I'll give you mine
                         Dbm
You're living in the lies
                E           B
Let them die let them go
                A  E
Let them go
```
