

## Sara Bareilles - Send Me The Moon

```
Sweet sun
Intro: G
                                                               Send me the moon
Holding my breath
                                                               Empty the skies out
Last one I've got left
                                                               Bringing me one step closer to you
      Fm
                                                                      Fm
till I see you
                                                               Send it soon
Deliver my heart with the
                                                               And I will breathe in, breathe out
                                                                     D
                                                               Until you come in and out
Pieces and parts of me left
                                                                     Em
                                                               Of you - oo you already do
Every last day seemed to carry the weight
A life time
                                                               Never you mind where the evening should find us
I Watch from the ground
As the gold fluttered down from the sky
                                                               Distance can't take what is hidden here
                                                               Safe in my chest
Sweet sun
Send me the moon
                                                               I'll wait for the day when
          Αm
Empty the skies out
         D
                                                               We finally say now or never
Bringing me one step closer to you
                                                               Till then I'll be here wanting more
Send it soon
                                                               As I settle for at most fear
                  Αm
And I will breathe in, breathe out
Until you come in and out
                                                               Sweet sun
C Em
Of you - oo
                                                                           Fm
                                                               Send me the moon
Of you - oo
                                                               Empty the skies out
                                                                      D
                                                               Bringing me one step closer to you
Inches away from you
                                                                       Em
                                                               Send it soon
Scared what I'll take from you, darling
                                                               And I will breathe in, breathe out
I could live with your ghost
                                                                            D
                                                               Till you come in and out
If you say that's the most that I'll get
                                                               I will breathe in, breathe out
Darkness to light
                                                               Till you come in and out
           D
Moved from day into night to be near you
                                                                              \mathsf{Am}
                                                               I will breathe in, breathe out
Still here I stand
                                                                            D
                                                               Till you come in and out
I am sinking like sand in your sea
                                                                      Em
                                                               Of you - oo
                                                               Of you - oo
```
