Into the night
           Fm
My long suffering friend
We'll be reborn again
Right here where everything ends
Face to the sky
A trail of smoke in the air
                Bbm
Pass into emptiness
New life's awaiting you there
Slave to some wretched old
Imagination of yesteryear
                     Ebm
Now all that grows in the skulls
Of the living are flowers of fear
The morning red
A sun-god calling you back
Down through a thousand years
White embers whistle and crack
Await the dawn with her kiss of redemption,
My firebird!
                      Ebm
You were the queen of the souls of all men
Before there was the w-o-r-d

           Cm Bbm
The morning new, the morning red,
