

## Scorpions - Always Be With You

```
Tom: D
                                                                I will always be with you
   [Intro] G Dm Am
       \begin{array}{cccc} G & Dm & Am \\ G & Dm & Am \end{array}
                                                                ( G Dm Am )
                                                                ( G Dm Am )
        C F Am F Am
                                                                (CFAmFAm)
I don't want to leave
                                                                I used to try and love
And break the connection
                                                                But felt no affection
               Dm
I don't want to leave
                                                                I really tried to love
I don't know how to love
                                                                I could never find
But you're the exception
                                                                The right direction
So it goes, so it goes
                                                                And you know, so it goes
You saved the man I was
                                                                Easy come, easy go
           Am
And now I believe it
                                                                I cannot take back what's been said and done
You changed the man I was
                                                                    F C
                                                                Things I cannot undo
I guess you're the reason
                                                                Now our time has only begun
I am breathing
                                                                Love breaks through
I only know what I know
                                                                All through the years
Then where you go I'll go
                                                                We found our way to a better day
                                                                G Am
You know you remind me of a loving song
                                                                No more tears
Like something new
                                                                I promise you
                                                                I'll be with you
Now that our time has only begun
                                                                All through the years
Love breaks through
All through the years
                                                                We found our way to a better place
                                                                G Am
We found our way to a better day
                                                                No more tears
                                                                I promise you
No more tears
                                                                I will always be with you
I promise you
```
