Am            G         F
  In her life, not much loving
Am                        C                  G
  From the early years she felt that she was falling
Am          G             F
  Even I've never seen her laughing
Am                        C                   G          Am
  Ask her why and she would say that she's still hoping for
love
         Am7            Am             Am7
Taste of love, taste of love, taste of love

Am            G        F
  In her time, so much growling
Am                        C                      G
  Why'd you ask her, no one hears that she's still calling
Am              G            F
  On and on and even you say loving
Am                        C                   G          Am
