Screeching Weasel - Science Of Myth

```
Intro: Gb
                                                                           Gb
                                                                                           В
if you've ever question beliefs that you hold you're not alone in fact for better understanding we take the facts of science
                                                               and apply them
but you oughtta realize that every myth is a metaphor
                                                               Fb
                                                               information
in the case of christianity
Eb Db
              В
and judaism there exist the belief
                                                               picture
              В
that spiritual matters are enslaved to history
                                                               through
the buddhists believe that the functional aspects override the Gb
                                                               beliefs held true
while other religions use the literal core to build
foundations with
                                                               Eb Db
                                                               it doesn't matter if it's real or not
Fb Db
                                                               Eb Db
                                                                              В
see half the world sees the myth as fact
             В
                                                               Eb Db
while it's seen as a lie by the other half
Eb Db
              В
                                                               Eb Db
                                                                              В
and the simple truth is that it's none of that
and somehow no matter what the world keeps turning
                                                               somehow we get by without ever learning
somehow we get by without ever learning
and somehow no matter what the world keeps turning
                                                               somehow we get by without ever learning
                                                               Fh
```

Acordes

```
science and religion are not mutually exclusive
                                      Db
                                      Dh
and if both factors keep evolving then we continue getting
but closing off possibilities makes it hard to see the bigger
consider the case of the women whose faith helped her make it
when she was raped and cut up left for dead in a trunk her
cause some things are better left without a doubt
and if it works then it gets the job done
somehow no matter what the world keeps turning
and somehow no matter what the world keeps turning
and somehow no matter what the world keeps turning
```

somehow we get by without ever learning
