

Selena Gomez - Camouflage

Tom: **G**
Intro: **G**

Dead end streets and boulevards
you threw in the towel, I broke your heart
but there's a first time for everything
Who would've thought you'd feel so cold?
And all these memories seem so old
to think you were my everything

Pré-Refrão:
Remember when we'd talk all night
but time ain't easy on us, our candle died

Refrão:
I got so much shit to say
but I can't help feeling like I'm camouflaged
Fortress around my heart
You were mine just yesterday
Now I have no idea who you are, It's like you're camouflaged
But it's good to see you here again, I don't wanna say goodbye
But it's about half past ten and I have to catch my ride

Riding alone on the 405 and life's so fragile, it's like I
could cry
If that's the last time I see you again

but I'll never tell you just how I felt
you might just not care and it might just not help
What if the feeling's just don't make no sense to you, you
