notes:

this song begins in the key of **Ab** (**Ab**) and changes to the key of **Bb** (**Bb**) after the bridge. on the guitar, the whole song is played in the key of **G**, with a capo on the first fret before the end of the bridge and on the third fret afterwards. if you don't have a capo, here's your motivation to get one. if you're still not motivated, you can just play without it and it won't sound much different. also note that the **Dm** chord here may just be an **F7M**, whichever you prefer. hit me up with your questions, comments, or requests.
