

Serj Tankian - Butterfly

Tom: G
 Intro: Em G
 Spare me the night
 Trampled upon by submission
 Amassed within one's own inhibition
 Where the only prohibition is love
 Spare me the night
 Trampled upon by submission
 Amassed within one's own inhibition
 Where the only prohibition is love
 Love
 (Em G Am)
 Children outcry, "grandfather sky"
 Rivers surviving through her eye
 We certified, how you falsified
 The beauty of a moth turned butterfly, butterfly
 Spare me the night
 Trampled upon by submission
 Amassed within one's own inhibition
 Where the only prohibition is love
 We are being sacrificed by our own suspicions
 We are being sodomized by repetitions
 Oceans calcified, egos gratified

I won't be crucified nor terrified, i'm not terrified
 Before we say goodbye, no need to falsify
 The beauty of a moth turned butterfly, butterfly
 Spare me the night
 Trampled upon by submission
 Amassed within one's own inhibition
 Where the only prohibition is love
 We are being sacrificed by our own suspicions
 We are being sodomized by repetitions
 We are being sacrificed by our own suspicions
 We are being sodomized by repetitions
 (Em G Em C D)
 A dark gray matter of fact sky
 Nannies our nights with our half sister moon
 Why can't we switch automatically
 To eco-centric persuasions
 Why can't we ditch autocracy
 For eco-centric persuasions now
 We are being sacrificed by our own suspicions
 We are being sodomized by repetitions
 We are being sacrificed by our own suspicions
 We are being sodomized by repetitions

Acordes
