

# Serj Tankian - Butterfly

Tom: G  
 Intro: Em G  
 Spare me the night  
 Trampled upon by submission  
 Amassed within one's own inhibition  
 Where the only prohibition is love  
 Spare me the night  
 Trampled upon by submission  
 Amassed within one's own inhibition  
 Where the only prohibition is love  
 Love  
 ( Em G Am )  
 Children outcry, "grandfather sky"  
 Rivers surviving through her eye  
 We certified, how you falsified  
 The beauty of a moth turned butterfly, butterfly  
 Spare me the night  
 Trampled upon by submission  
 Amassed within one's own inhibition  
 Where the only prohibition is love  
 We are being sacrificed by our own suspicions  
 We are being sodomized by repetitions  
 Oceans calcified, egos gratified

I won't be crucified nor terrified, i'm not terrified  
 Before we say goodbye, no need to falsify  
 The beauty of a moth turned butterfly, butterfly  
 Spare me the night  
 Trampled upon by submission  
 Amassed within one's own inhibition  
 Where the only prohibition is love  
 We are being sacrificed by our own suspicions  
 We are being sodomized by repetitions  
 We are being sacrificed by our own suspicions  
 We are being sodomized by repetitions  
 ( Em G Em C D )  
 A dark gray matter of fact sky  
 Nannies our nights with our half sister moon  
 Why can't we switch automatically  
 To eco-centric persuasions  
 Why can't we ditch autocracy  
 For eco-centric persuasions  
 We are being sacrificed by our own suspicions  
 We are being sodomized by repetitions  
 We are being sacrificed by our own suspicions  
 We are being sodomized by repetitions
