Sia - Lullaby

Tom: G

```
     G                     Em
Send a wish upon a star
C                        G
 Do the work and you'll go far
G                    Em
 Send a wish upon a star
C                      G
 Make a map and there you are

G                  Em
Send a hope upon a wave
C                        G
A dying wish before the grave
G                    Em
 Send a hope upon a wave
C                          G
 For all the souls you failed to save

                  C
And you stood tall
             Em
 Now you will fall
                    Am
 Don't break the spell
                        D
 Of a life spent trying to do well

                  C
And you stood tall
             Em
 Now you will fall
                 Am
 Don't break the spell
                        D
 Of a life spent trying to do well

G                      Em
Send a question in the wind
```

```
              C                    G
It's hard to know where to begin
G                            Em
 So send the question in the wind
 C                        G
And give an answer to a friend

G                         Em
Place your past into a book
           C                    G
Put in everything you ever took
G                       Em
 Place your past into a book
C                        Em
Burn the pages let them cook

                     C
And you stood tall
                Em
 Now you will fall
                       Am
Don't break the spell
                           D
 Of a life spent trying to do well

                     C
And you stood tall
                Em
 Now you will fall
                      Am
Don't break the spell
                          D
 Of a life spent trying to do well

G                      Em  G    Em
Send a wish upon a star
G                      Em
 Send a wish upon a star

(G    Em )
```
